

Enroll in the Program Today

Together we can make a difference in your child's asthma.

We partner with community hospitals, health centers and your child's doctor to enroll patients into our Community Health Worker Asthma program.

The South Side Pediatric Asthma Center is powered by UChicago Medicine.

For more information and to enroll call (773) 702-5668 or visit www.SouthSideKidsAsthma.org

Community Health Worker

Community Health Workers (CHWs) are community members trained about asthma.

CHWs work with the family and the child's doctor to help families understand asthma.

CHWs also work alongside people who are around your child to help keep your child healthy and manage their asthma.

This includes their school or daycare.

Pediatric Asthma Program

During the program, CHWs:

- Work with families and children that have severe asthma.
- Deal with barriers and the conditions that contribute to asthma.

What to Expect

A Community Health Worker will:

- Provide education on asthma
- Check with the family by making home visits and phone calls
- Talk about medications, devices and how to use them
- Review Asthma Action Plan

What We Can Do

A Community Health Worker:

- Helps you know your asthma signs and symptoms
- Offers home environmental assessments to know the common triggers and barriers in the home
- Provides supplies to deal with environmental triggers
- Talks about Green Cleaning
- Helps connect you to community resources based on the needs of your family
